Towers

Graphic Focal Points for Field Events

Multi Directional Graphic/Scaffold Towers

Tower Architecture: Standard scaffold structures create a 5'x7'x15' graphic tower. Scaffold components can be purchased from Project Graphics or rented locally.
Graphics: Digitally printed speaker mesh banners allow for 70% blow-through. Graphic measurements are 5'x15' and 7'x15'. Two of each size required to create the tower.
Installation: Graphics attach to tower with zip ties through grommets installed on the perimeter of the mesh. Scaffolding must be staked in the center to prevent tipping.
Options:

Adorn corners with flags, pennants, and streamers.
Flank two towers with banners to create an entranceway.
Graphics can be produced for any tower configuration.

Product Weight:

Graphics: 70 lbs. Ships in (4) boxes.
Scaffold Tower: 266 lbs. Ships via freight.

Warranty: Not applicable
Delivery: 3 weeks
