Graphic and Decorative Installations in North America

In House Installation Team:

Project Graphics employees experienced technicians who perform regional and national installations of graphics and decorations. These employees are located in Burlington, Vermont and Los Angeles, California and are charged with supervising field install teams consisting of business partners and/or affiliations consigned by Project Graphics.

Partnerships:

Project Graphics is partnered with a full service installation team that is centrally located in the U.S and manages a wide variety of both graphic applications and seasonal décor installations. This partnership enhances the company's core-competency when project scope and technicality associated with some installations require professional services, heavy equipment and larger staffing. All installers are bonded and insured.

Site Meetings:

Site meetings may be planned depending on project scope and attended by Project Graphics management and designers.

How we guarantee results.

- Pre-Production Proofs and Prototypes
- Color and Product Samples
- Photo Mock Ups
- Manufacturer Direct Warranty
- Environmental Compliance in Manufacturing
- Positive Company Culture
