

# Large Format Mounted Banners

Banners fabricated with vinyl, mesh or lightweight fabrics in grand formats. Hemming and welding are utilized to tile extra-large installations. Substrates are chosen based on finished size and installation environment. These banners are priced by the square foot.

**Substrates:** 13oz vinyl, 18oz vinyl, blow-thru vinyl mesh, and fabric.

**Digital Print:** Cost effective at all volume levels. Dye-sublimation printing available.

**Options:** Customization of finishing specifications (below)

## Finishing Options

Pocket

Grommet

Webbing

D-Ring

Fringe

Trim

# Overhead Banners and Pennants

Over the street banners and overhead pennants fabricated in any size for installation over your audience. These items can be constructed to any size using lightweight fabrics or heavy duty vinyl or mesh substrates.

**Substrates:** 13oz vinyl, 18oz vinyl, blow-thru vinyl mesh, and fabric.

**Digital Print:** Cost effective at all volume levels. Dye-sublimation printing available.

**Options:** Customization of finishing specifications (below)

# Fabric Flags for Light Poles

Light weight fabric flags and mounting systems for attachment to lightpoles. These can be used on lightpoles that already have an existing banner mounted or used on poles that are vacant. Fabric flag mounts are easy to install with simple banding rings and do not add wind load to the pole. An excellent way to get your event emblem in the air over the heads of the crowd.

**Substrates:** Poly Flag

**Digital Print:** Cost effective at all volume levels.

Dye-sublimation printing available.

# Extension Banners

Get your message overhead with these portable banner displays. These can be elevated far above the crowd to designate venues at your event site. An arm on the top of the pole holds the banner open so the information can be seen from afar. Mounting poles are inserted into water filled bases.

**Sizing:** 6' to 40' high.

**Hardware Specifications:** Strong telescoping display pole. Reinforced fiberglass pole offers durability against the elements all while displaying your message.

**Construction:** Fiberglass composite

Features:

- Strong, durable, long lasting fiberglass construction
- No fiber bloom (fiberglass slivers)
- FR rated: Self extinguishing
- Can withstand high winds
- Fully assembled

Other Examples

# Light Pole Banners

Constructed for short and long term installations.  
The selection of substrates includes 13oz vinyl, 18oz vinyl, Combined Polyester and Sunbrella Marine Acrylic.

**Hardware:** Constructed to fit PoleGear mounting system or any existing hardware.

**Options:**

- Single and dual-ply construction
- Sponsorship add-ons
- Custom sizes and shapes
- Installation services available to the Options section

Points of Difference

Spur Grommets

Double Rolled Pockets

Double Needle Lock Stitch

# Event Tents

## Portable, Heavy Duty, Customizable Field Displays

**Sizes:** Three sizes: 10'x10', 10'x15', 10'x20'.

**Construction:** Vary by style, see specs below. All kits include frame, canopy, stakes and roller bag.

**Graphics:** Full coverage dye-sublimation print.

**Options:** Back walls, sides walls, half walls.

# Teardrop Banners

## Rotating Shapes in Motion that Capture Attention

**Standard Kit:** Pole, printed flag, ground stake and nylon travel/storage bag.

**Poles:** Fibrous graphite composite for maximum flexibility and durability.

Stand Options:

Ground Stake

Hard Surface Stand

\* Custom sizes available.

# Blade Banners

## Rotating Shapes in Motion that Capture Attention

**Standard Kit:** Pole, printed flag, ground stake and nylon travel/storage bag.

**Poles:** Fibrous graphite composite for maximum flexibility and durability.

Stand Options:

Ground Stake

Hard Surface Stand

\* Custom sizes and shapes available.

## Multi Directional Graphic/Scaffold Towers

**Tower Architecture:** Standard scaffold structures create a 5'x7'x15' graphic tower. Scaffolding can be purchased from Project Graphics or rented locally.

**Graphics:** Digitally printed speaker mesh banners allow for 70% blow-through.

**Installation:** Graphics attach to tower with zip ties through grommets installed on the perimeter of the mesh. Scaffolding is staked in the center to prevent tipping.

### Options:

- Flank two towers with banners to create an entranceway.
- Adorn corners with flags, penants and streamers.
- Graphics can be produced for any tower configuration.

# Crowd Barricade Covers

## Highly Visible, Space Defining Advertising

- Single or double sided messaging.
- Standard 34"x98". Custom sizing available.
- Wrinkle/stain resistant combined poly fabric, Sunbrella, or vinyl.
- Envelope construction with grommets and zip ties.

# Digital Media for Floors and Sidewalks

## Messaging at Your Footsteps

Adhesive floor and sidewalk graphics

**Substrates:** 3M vinyls with appropriate over-laminate and adhesive backing are determined by interior/exterior, floor vs. sidewalk..

**Options:** Square cut or die cut shapes.
